Service Kits

For boilers and waste heat recovery systems

Save time and effort with dedicated kits for key tasks
Securing peak performance can be effortless and cost-effective with Alfa Laval Service Kits. Our Service Kits contain all the parts you need for routine maintenance tasks, periodic maintenance work or even basic repair needs. Whatever the kit focus, you get correct parts that comply with relevant regulations and meet or exceed sustainability requirements – delivered quickly and efficiently for the best possible value.

Our service helps you with:

- Easy access to the right OEM spare parts
- Increased uptime through correct actions and service intervals
- More efficient procurement and shipping logistics
- Reduced cost compared to ordering single parts

How it works

Alfa Laval Service Kits are predefined packages that simplify maintenance and repair tasks. With their help, you can easily safeguard or restore uptime and performance – contributing to longer equipment lifetime in the process.

The kits contain genuine Alfa Laval spare parts, which are made with the latest technology, the correct materials and our design expertise. The parts are a perfect fit for your equipment, providing unmatched reliability and durability.

The contents of each kit are aligned with your equipment's life cycle and operational needs. For Alfa Laval Aalborg boilers and waste heat recovery systems, we provide the Service Kits below:

- **Recommended Kits**
  A start-up stock of parts that should always be on board
- **Biofuel Recommended Kits**
  Replacement parts for those degraded by biofuel acidity
- **Emergency Kits**
  Parts for quickly restoring the uptime of critical equipment
- **5-Year Service Kits / Dry Dock Kits**
  Parts for equipment overhaul during regular dry docking

For more details about these kits, see the following page.

As a complete service provider, we ensure not only high-quality parts but also streamlined procurement. Our Service Kits offer fast access with reduced administration, and our global network allows optimized, on-time delivery. You save time and cost compared to ordering individual parts, and we can ship efficiently for the lowest possible CO_2 impact.

How the service can be delivered

On site | Remotely | At service centres | On board | In dry dock

Recommended Kits

Intended to be kept as onboard inventory, Recommended Kits simplify budgeting while reducing operational risk. They contain the most common spare parts required for up to two years of operation, supporting immediate response to unexpected failures or defective components. Maintaining this stock on board ensures readiness and helps keep downtime to a minimum.

The kit contents depend on the boiler system, but they typically include:

- Boiler and pump gaskets, including repair kit
- Consumable valve parts and spare part kit
- Burner parts
- Electrical equipment for control panel
- Other gaskets, consumable parts and repair kits

Biofuel Recommended Kits

Biofuel Recommended Kits are specifically for boilers that operate on biofuels, which may have higher acidity than other fuels. The kits contain the recommended gaskets, sealings and nozzles for the fuel line and burner, so that function can quickly be restored if these components deteriorate. The kits are available for Alfa Laval Aalborg boilers with single-line or double-line fuel systems.

Emergency Kits

Designed for rapid intervention in critical situations, Emergency Kits enable fast restoration of system functionality in the event of a failure. In many cases, the crew can perform repairs on board using the included parts, supported remotely by Alfa Laval service experts. Immediately after, the parts used should be replenished to maintain readiness.

The kits contain parts for:

- Control panel
- Oil flow components
- Ignition burner
- Main burner
- Fuel oil regulating valve

5-Year Service Kits / Dry Dock Kits

Intended to support scheduled activities in dry dock, 5-Year Service Kits / Dry Dock Kits enable both proactive maintenance and complete equipment overhauls. Depending on the equipment, they may include not only critical components but also optional upgrades, selected by you in advance.

24/7 Service & Support

With service centres, field service engineers and spare parts distribution worldwide, our Alfa Laval Marine Service network is always on the job for you. When you contact our 24/7 Service & Support, our service experts coordinate everything to solve your need – across oceans, continents and time zones.
