Alfa Laval

Replacement

For fuel and lube purifiers

Take the fast track to better separation

Upgrade your purifier for better efficiency, lower maintenance costs and long-term reliability. Whether you need a quick replacement for a worn-out bowl or a full purifier upgrade, we offer both new and refurbished solutions from stock, ensuring minimal downtime. Either choice is a future-proof investment that safeguards your operations, and choosing a refurbished option contributes to sustainability as well.

Our service helps you with:

- Improved separation efficiency and engine protection
- Reduced maintenance and consumption of spare parts
- Energy savings for a smaller carbon footprint
- Sustainable contribution to a circular economy
- Ready-to-move stock for fast delivery

How it works

Replacing a bowl or an entire aging purifier is a smart way to improve separation performance and reduce your consumption of energy and spare parts. We offer:

- **Refurbished purifier bowls**

If you need a replacement bowl for an older purifier range, we maintain refurbished stock. Refurbished bowls are a cost-effective, readily available alternative to new bowls, which often have long lead times.

- **Full purifier replacement (new)**

If your purifier is old, upgrading to a new one from our Alfa Laval S and P Flex range will drastically improve performance and operating costs. Purifiers from the S and P Flex range are also ideal for replacing modern purifiers with major breakdowns, as they combine the best possible separation efficiency with the lowest consumption of energy and spare parts.

- **Full purifier replacement (refurbished)**

If your budget is limited, or if you want to contribute to a circular economy, choose from our stock of complete refurbished purifiers. When refurbishing, we strip down the machine, examine all critical parts and perform rigorous tests. That allows us to provide a two-year warranty.

How the service can be delivered

On site

Remotely

At service centres

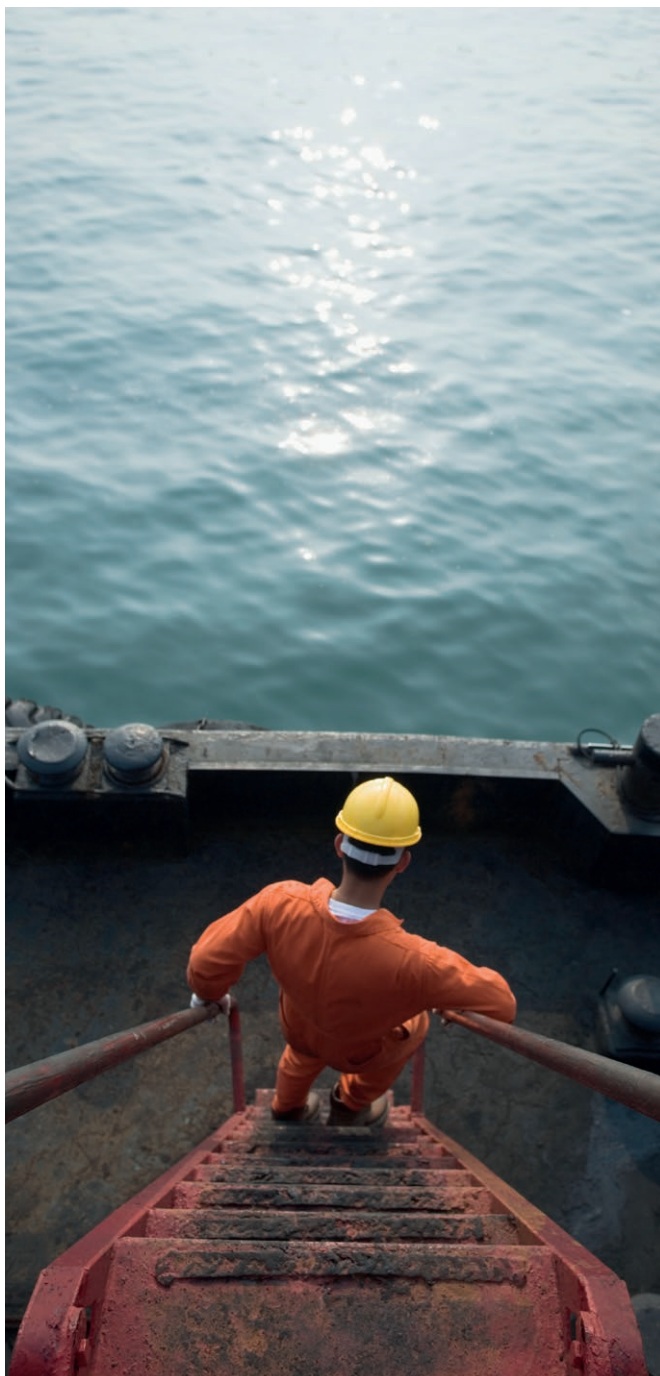

On board

In dry dock

Case story

Fast and reliable support when it matters most

A RoRo vessel was forced to undergo extensive repairs in the Port of Piraeus, Greece, and the operational setback was severe. The vessel had suffered two broken crankshafts on its Wärtsilä 46 main engine, which would require a three-month stay in the port's repair zone.

The root cause was poor lubrication management. The vessel had four lube oil purifiers of a competitor brand, all of which were in poor condition. Without proper oil treatment, the engine's condition had deteriorated significantly.

Frustrated by the lack of service support from the competitor, and recognizing the value of Alfa Laval's reliable solutions on their other vessels, the shipowner made a decisive move – replacing all four lube oil purifiers (plus one fuel oil purifier) with Alfa Laval units.

Thanks to our exclusive stock of ready-to-ship purifiers, we were able to deliver quickly, ensuring that the vessel could resume operations with minimal further delays. The shipowner was highly satisfied, and the experience has reinforced their trust in our expertise and service reliability.

24/7 Service & Support

With service centres, field service engineers and spare parts distribution worldwide, our Alfa Laval Marine Service network is always on the job for you. When you contact our 24/7 Service & Support, our service experts coordinate everything to solve your need – across oceans, continents and time zones.
