

Alfa Laval

Service Kits

For fuel and lube purifiers

Reduce cost, hassle and footprint with kits for routine tasks

Securing peak performance can be effortless and cost-effective with Alfa Laval Service Kits for regular maintenance. Our Service Kits contain all the parts needed for routine tasks defined in your equipment's maintenance plan. You get correct parts that comply with regulations and meet or exceed sustainability requirements, delivered quickly and efficiently for the best possible value.

Our service helps you with:

- Easy access to correct OEM spare parts
- Minimized downtime through planned service actions
- Avoidance of rush order fees and additional freight charges
- Reduced CO₂ footprint through streamlined procurement

How it works

Alfa Laval Service Kits are predefined packages of essential parts that simplify routine maintenance and repair tasks. With their help, you can easily restore and safeguard peak equipment uptime and performance.

Designed to optimize uptime and operability, our Service Kits for Alfa Laval fuel and lube purifiers include all necessary parts for preventive maintenance according to a five-year maintenance plan:

- Intermediate Service Kit (every 6 months)
- Major Service Kit (every 18 months)
- 3-Year Service Kit
 - Intermediate Service Kit
 - Major Service Kit
 - Sludge pump service kit
- 5-Year Service Kit / Dry Dock Service Kit
 - Intermediate Service Kit
 - Major Service Kit
 - Sludge pump service kit
 - Feed pump overhaul kit
 - Water valve block overhaul kit and constant flow valve kit

The 5-Year Service Kit is designed for dry dock maintenance, which is a full reset of the separator system or module to prepare it for another five years of stable operation.

As a complete service provider, we ensure not only high-quality parts but also streamlined procurement. Our Service Kits are designed for fast access with reduced administration, and our global network optimizes delivery times. You save time and cost compared to ordering individual parts, and we can ship efficiently for the lowest possible CO₂ impact.

How the service can be delivered

On site

Remotely

At service centres

On board

In dry dock

Case story

Simplifying dry dock planning for a global car carrier operator

A major international car carrier operator was in the process of planning dry docking for several vessels. But the superintendents were facing a common challenge: determining the spare parts needed to fully service the fuel and lube purifiers and their related ancillaries. With multiple components to consider for each purifier, sourcing the correct parts individually was proving to be both time-consuming and complex.

After discussing the situation with Alfa Laval, the operator chose to have a Performance Assessment on each vessel prior to dry docking. With the help of Alfa Laval Marine Service engineers, questionnaires were filled in and the right overhaul parts for the purifiers, sludge pumps, feed pumps and water valve blocks were identified and ordered. Immediately, the customer saw the value in the 5-Year Service Kit, which allowed the right overhaul parts to be procured in one go.

Today, the operator is making 5-Year Service Kits standard for upcoming dry dock projects. Besides simplifying the ordering process compared to sourcing individual parts, the kits eliminate the risk of missed critical components, last-minute orders and costly delays. With everything delivered in one shipment, the kits are best practice for separator maintenance and reliable performance after dry docking.

24/7 Service & Support

With service centres, field service engineers and spare parts distribution worldwide, our Alfa Laval Marine Service network is always on the job for you. When you contact our 24/7 Service & Support, our service experts coordinate everything to solve your need – across oceans, continents and time zones.
