Dew point analyser upgrade

For inert gas systems

Replace obsolete equipment to mitigate future risk

The dew point analyser is vital to the operation of your Alfa Laval inert gas system, and its OEM has introduced a new design that replaces older models. As a proud service partner for the lifetime of your system, we recommend upgrading MTS4 and MTS5 analysers to avoid potential risk. We can supply a dew point analyser upgrade package tailored to your inert gas system.

Our service helps you with:

- Analyser equipment that meets the latest standards
- Continued availability of spare parts
- Reduced risk of disruption to inert gas system operations
- Risk-free and cost-effective upgrading – we match your system and handle all parts, programming and engineering

How it works

Proactive upgrading will bring your inert gas system's dew point analyser up to today's OEM standards. With the latest analyser design, you can be sure of access to analyser spare parts for your vessel's remaining lifetime.

As the manufacturer of your inert gas system, with access to its original design data, we can provide a tailored analyser upgrade kit and update your system's documentation. Before anything is shipped, we compile the correct parts and ensure the correct settings.

The upgrade kit includes the following:

- Digital indicator module, pre-programmed for your specific inert gas system
- Dew point probe
- Updated process and electrical documents/ drawings

If you wish, a certified Alfa Laval Marine Service engineer can install the upgrade on board. Our sales representatives can provide up-to-date information about service rates.

How the service can be delivered

On site

Remotely

At service centres

On board

In dry dock

24/7 Service & Support

With service centres, field service engineers and spare parts distribution worldwide, our Alfa Laval Marine Service network is always on the job for you. When you contact our 24/7 Service & Support, our service experts coordinate everything to solve your need – across oceans, continents and time zones.
