

How it works

If an obsolete controller should fail, you run the risk of extended downtime when a replacement is difficult or impossible to find. Proactive upgrading is best, but a controller replacement must be chosen with care. Otherwise, variations in voltage can lead to installation issues.

We ensure a problem-free replacement by tailoring a controller upgrade kit to your Alfa Laval inert gas system. Before anything is shipped, we compile the correct parts and ensure the compatibility of the software.

The upgrade package includes:

- Alfa Laval controller with the latest software pre-installed
- Installation-specific pre-programming
- Connection materials
- Updated process and electrical documents/drawings

If you wish, a certified Alfa Laval Marine Service engineer can install the upgrade on board. Our sales representatives can provide up-to-date information about service rates.

Alfa Laval

Controller upgrade

For inert gas systems

Replace obsolete equipment to mitigate future risk

The controllers in Alfa Laval inert gas systems play a vital role in regulating water level, temperature and pressure. Certain controllers (SKS30, KS40, KS50, KS90 and Shimaden SR62) have now been defined as obsolete by their OEMs, which means that spare parts are no longer available. To protect against unexpected downtime, we can provide a tailored controller upgrade that ensures a problem-free replacement.

Our service helps you with:

- Control equipment that meets the latest standards
- Continued availability of spare parts
- Easy one-to-one replacement
- Risk-free and cost-effective upgrading – we match your system and handle all parts, programming and engineering

How the service can be delivered

On site

Remotely

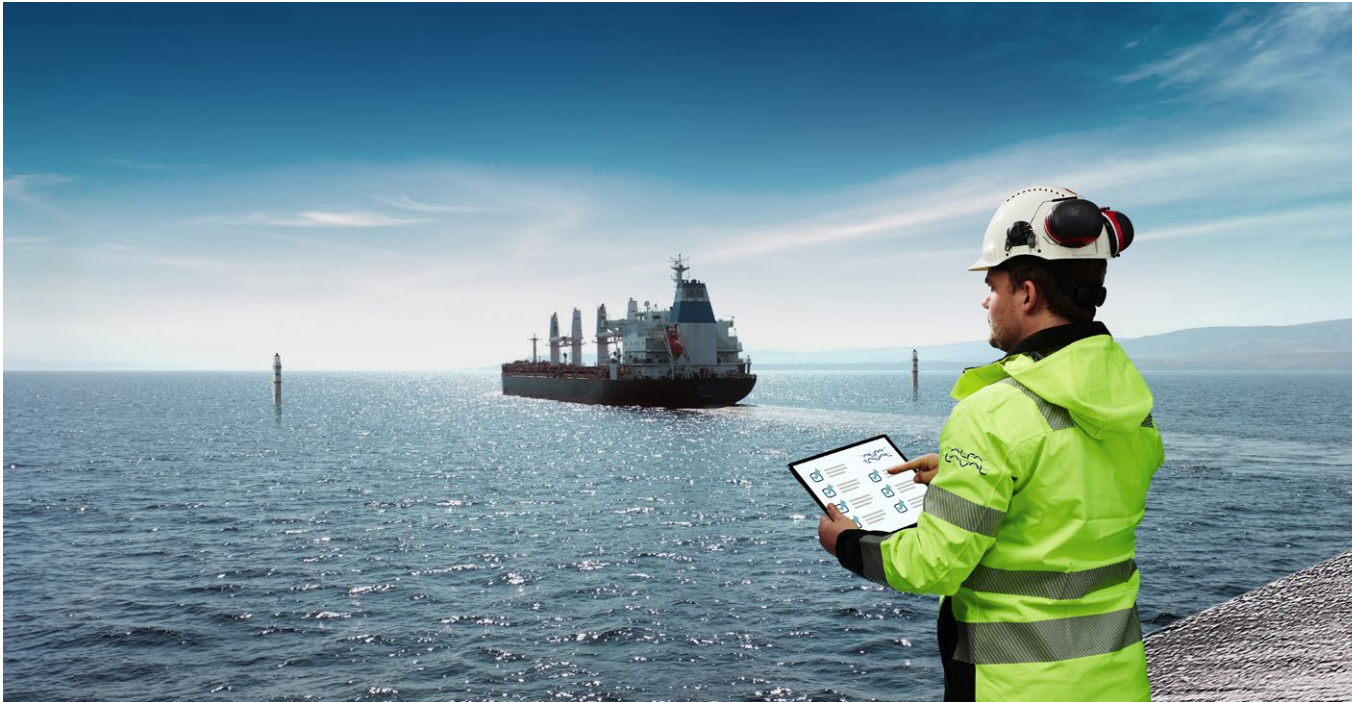

At service centres

On board

In dry dock

24/7 Service & Support

With service centres, field service engineers and spare parts distribution worldwide, our Alfa Laval Marine Service network is always on the job for you. When you contact our 24/7 Service & Support, our service experts coordinate everything to solve your need – across oceans, continents and time zones.
