

# Alfa Laval CB210 / CBH210 / CBK210

# Brazed plate heat exchanger

# Introduction

Alfa Laval CB brazed plate heat exchangers provide efficient heat transfer with a small footprint.

# Applications

- HVAC heating and cooling
- Refrigeration
- Oil cooling
- Industrial heating and cooling

### **Benefits**

- Compact
- · Easy to install
- Self-cleaning
- Low level of service and maintenance is required
- All units are pressure and leak tested
- Gasket free

# **Branded Features**

FlexFlow™ Superior thermal performance

PressureSecure Unparalleled strength for demanding duties

ValuePlus Total support – with value-adding options to fit your needs

Design

The brazing material seals and holds the plates together at the contact points ensuring optimal heat transfer efficiency and pressure resistance. Using advanced design technologies and extensive verification guarantees the highest performance and longest possible service life.

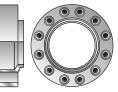

Different pressure ratings are available for different needs.

Asymmetric channels provide optimal efficiency in the most compact design.

Based on standard components and a modular concept, each unit is custom-built to meet the specific requirements of each individual installation.

Designed for full vacuum.

Alfa Laval plate heat exchangers are available with a wide range of pressure vessel approvals. Please contact your Alfa Laval representative for more information.

**NOTE:** Values above are to be used as an indication. For exact values, please use the drawing generated by the Alfa Laval configurator or contact your local Alfa Laval representative.

#### Marine approvals

CBMK210 can be delivered with marine classification certificate (ABS, BV, CCS, ClassNK, DNV-GL, KR, LR, RINA, RMRS)
